Summary

Software Developer and Full-Stack Engineer with 3+ years of professional experience developing and deploying mobile, web, and cloud-based applications. Core engineer behind 6 production platforms at XORGeek, with a strong focus on mobile application development using Flutter and cross-platform solutions, alongside Angular-based web development. Experienced in AWS cloud services, REST API development, SQL/NoSQL databases, PL/SQL programming, database optimization, and data management. Skilled in integrating backend services with mobile applications and building scalable, reliable software solutions. Co-author of peer-reviewed research in Machine Learning and Computer Vision published in IEEE and JSTR.

Skills

Languages: C/C++, Java, Python, JavaScript, TypeScript, Dart, SQL, NoSQL

Frameworks & Cloud: AWS (EC2, S3, DynamoDB, Lambda, SQS, SNS, Route53), Docker, Flutter, Angular, Firebase, MySQL, REST APIs, Git

AI Tools & Acceleration: Claude (Claude Code, Anthropic API, Prompt Engineering), ChatGPT, GitHub Copilot, Cursor

Work Experience

Software Developer Aug 2023 - Present

XORGeek, Bangladesh

- Served as Core Developer for **RunMate Club** (cross-platform marathon platform); engineered hardened background GPS tracking resilient against OS process kills, a 3-layer anti-cheat engine, sub-second live race telemetry via Firebase RTDB, and SSLCommerz multi-merchant payments.
- Architected and deployed 6 production platforms (RunMate Club, Koyama Shokai, Pet Auction App, KEIAI Order App, Izumi, Ginsen) across Angular web SPAs, Flutter mobile apps, and AWS serverless cloud infrastructure.
- Designed high-throughput REST APIs and scalable SQL/NoSQL schemas (MySQL, PostgreSQL, DynamoDB), reducing data retrieval latency and improving API response times across client products.
- Implemented strict 4-tier Role-Based Access Control (RBAC) with route guards, action-level permission matrices, and automated PDF reporting pipelines for enterprise healthcare logistics (Koyama Shokai).
- Accelerated team delivery by integrating AI engineering workflows (Claude, Copilot) for schema design and code refactoring, mentoring junior developers, and conducting technical code reviews.

Software Development Intern Jun 2023 - Jul 2023

XORGeek, Bangladesh

- Developed modular, responsive mobile UI components and state-managed screens using Flutter and Dart under senior engineering mentorship.
- Collaborated with the backend team to design normalized MySQL database schemas, write optimized queries, and integrate secure RESTful APIs.
- Participated in agile sprints, code reviews, and architecture discussions, demonstrating high-impact delivery that led to promotion to full-time Software Developer.

Software Engineer Jan 2021 - May 2023

Software & Application Development, Bangladesh

- Built and deployed commercial cross-platform mobile applications with Flutter and responsive web interfaces using JavaScript and TypeScript.
- Designed RESTful APIs, relational database schemas (MySQL, PostgreSQL), and server-side business logic supporting multiple external client products.
- Integrated secure user authentication, transactional payment gateways, and third-party APIs with comprehensive error handling and logging.
- Optimized complex SQL queries, restructured indexing strategies, and created reusable UI component libraries to speed up subsequent sprint delivery.

Featured Projects

- **Pet Auction App:** Designed real-time bidding architecture, synchronized live auction data streams using AWS and NoSQL, and developed Angular web and Flutter mobile client interfaces.
  Technologies: *Angular, Flutter, Dart, AWS, NoSQL, Firebase*
- **Koyama Shokai:** Engineered a hospital delivery & logistics management SPA with 4-tier Role-Based Access Control (RBAC), standalone Angular architecture, RxJS state management, and AWS Serverless REST API integration.
  Technologies: *Angular, TypeScript, AWS Lambda, S3, RxJS, REST APIs*
- **RunMate Club:** Core developer for a marathon companion platform with real-time GPS tracking, anti-cheat engine, offline-first sync, live leaderboards, and SSLCommerz payment integration.
  Technologies: *Flutter, Dart, Firebase RTDB, Cloud Functions, GetX, SSLCommerz*
- **Gram Stain Atlas:** Built a clinically-oriented mobile reference app published on Google Play and Apple App Store (Japan), cataloging 50+ bacterial species with microscopic slide imagery, clinical explanations, native audio pronunciations, and offline SQLite storage.
  Technologies: *Flutter, Dart, SQLite, Audio Player APIs, Android & iOS*
- **KEIAI Order App:** Engineered a cross-platform commercial ordering management application for a Japanese enterprise, enabling streamlined order placement, real-time inventory tracking, and synchronized mobile and web client workflows.
  Technologies: *Flutter, Dart, REST APIs, State Management*
- **Izumi Workflow Manager:** Developed an internal operations management web platform for an automotive service client, centralizing multi-bay vehicle repair tracking, job status timelines, parts ordering, and AWS DynamoDB data persistence.
  Technologies: *Angular, TypeScript, Python, AWS DynamoDB, REST APIs*
- **RemindLy:** Designed a privacy-focused, offline-first routine and workout tracking mobile app featuring closed-app background notifications, interactive reorderable checklists, daily analytics, and local JSON backup/restore.
  Technologies: *Flutter, Dart, SQLite, Local Notifications*

Thesis & Publications

- **Traditional Bengali Food Classification and Calorie Measurement Using Machine Learning** — Published in *JSTR, BOU*, **2025**.
- **A Deep Learning Approach to Analyze the Relationship Between Gender, Height, Weight, and Basal Metabolic Rate from Face Images** — S. Islam Siam, S. A. H. Chowdhury, Nafi Ahmed & Swapneel Biswas. Published by *IEEE*, **2025**.
- **Drought Forecast Using Traditional and Custom Models for Dhaka, Bangladesh** — A. H. Mridul, T. Bose, S. Biswas, Nafi Ahmed, et al. Published in *Research in Ecology*, **2025**.

Education

Ahsanullah University of Science and Technology, Dhaka 2018 - 2023
B.Sc. in Computer Science and Engineering ***CGPA: 3.208/4.00***
Relevant Coursework: Data Structures & Algorithms, OOP, Database Systems, OS, Software Engineering, API Development

Dhaka City College, Dhaka 2017 - 2018
Higher Secondary Certificate (HSC) — Science ***GPA: 4.88/5.00***

Monipur High School and College, Dhaka 2010 - 2016
Secondary School Certificate (SSC) — Science ***GPA: 5.00/5.00***

Leadership & Involvement

- **Program Organizer, AUST CSE Society (Jan 2022 – Jul 2022):** Organized departmental programs, workshops, and technical events.
- **General Member, AUST Innovation and Design Club (Jan 2019 – May 2022):** Contributed to innovation challenges and club hackathons.
