Skills

Languages & Databases: Python, **SQL**, NoSQL (DynamoDB, Firebase), C/C++, JavaScript, TypeScript, Java

Data & Cloud Technologies: **Data Analysis**, **Data Cleaning**, **Trend Analysis**, **Business Reporting**, **Dashboard Development**, **Tableau**, **Power BI**, **Excel**, Machine Learning, AWS, Docker, REST APIs

Work Experience

Software Developer

Aug 2023 - Present

XORGeek, Bangladesh

- Engineered data-driven applications and optimized database queries using SQL and NoSQL within AWS infrastructure.
- Designed and maintained data collection pipelines and REST APIs for seamless data flow in systems like Izumi and Ginsen.
- Managed and processed real-time structured and unstructured data for high-traffic platforms like the Pet Auction App.
- Analyzed application performance and backend scalability, significantly improving data retrieval times and API efficiency.
- Technologies: SQL, NoSQL, AWS (DynamoDB, S3, Lambda), Firebase, TypeScript, Angular, Flutter.

Software Development Intern

Jun 2023 - Jul 2023

XORGeek, Bangladesh

- Gained hands-on experience in backend data architecture and API integration using Laravel and MySQL.
- Assisted in designing basic database schemas and query structures for mobile and backend applications.
- Technologies: MySQL, PHP, Laravel, Flutter, Dart.

Project Work

- Pet Auction App:** Designed and optimized the database architecture for a real-time bidding system. Implemented efficient data retrieval and synchronization mechanisms for pet listings using AWS and NoSQL.
Technologies: AWS, NoSQL, Angular, Flutter, Dart
- KEIAI Order App:** Managed order data flows and structured backend SQL databases to handle complex product catalogs. Streamlined order processing and data integration via APIs.
Technologies: MySQL, Laravel, AWS, Flutter
- Izumi Web Project:** Built a service tracking platform that collects and processes operational workflow data. Engineered dashboards and improved data visibility for car repair and delivery management.
Technologies: AWS, SQL, Angular
- Ginsen Web Project:** Engineered a scalable data ingestion system for dynamic forms, facilitating flexible data collection, formatting, and processing pipelines using AWS backend services.
Technologies: AWS, JSON, HTML

Thesis & Publications

- Traditional Bengali Food Classification and Calorie Measurement Using Machine Learning** — Published in *Journal of Scientific and Technological Research (JSTR)*, Bangladesh Open University (BOU), **2025**.
- A Deep Learning Approach to Analyze the Relationship Between Gender, Height, Weight, and Basal Metabolic Rate from Face Images** — S. Islam Siam, S. A. H. Chowdhury, Nafi Ahmed & Swapneel Biswas. Published by *IEEE*, **2025**.

Education

Ahsanullah University of Science and Technology, Dhaka

2018 - 2023

B.Sc. in Computer Science and Engineering

CGPA: 3.208/4.00

Relevant Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Systems, Operating Systems, Computer Networks, Software Engineering, Design Patterns, API Development, Advanced HTML/CSS

Leadership and Involvement

- Program Organizer, AUST CSE Society (Jan 2022 – Jul 2022):** Organized departmental programs, workshops, and technical events for CSE students.
- General Member, AUST Innovation and Design Club (Jan 2019 – May 2022):** Contributed to innovation challenges, design projects, and club activities.
